## REPORT ON THE EIGHTH CENSUS OF CANADA, 1941

*To His Excellency the Right Honourable the Earl of Athlone, K.G., P.C., G.C.B., G.C.M.G., G.C.V.O., D.S.O., A.D.C., Governor General and Commander-in-Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to lay before your Excellency the seventh volume of the Report of the Eighth Census of Canada taken as of date June 2, 1941. This volume classifies the gainfully occupied by occupation and industry to show sex, age, conjugal condition, birthplace, period of immigration, racial origin, years of schooling, industrial status, etc.

I have the honour to be,
Your Excellency's most
obedient servant,

JAMES A. MACKINNON,
*Minister of Trade and Commerce.*

OTTAWA, December 8, 1944.

## RAPPORT SUR LE HUITIÈME RECENSEMENT DU CANADA, 1941

*A Son Excellence le très honorable comte d'Athlone, K.G., C.P., G.C.B., G.C.M.G., G.C.V.O., D.S.O., A.D.C., Gouverneur Général et Commandant en Chef du Dominion du Canada.*

QU'IL PLAISE À VOTRE EXCELLENCE:

J'ai l'honneur de soumettre à Votre Excellence le septième volume du rapport sur le huitième recensement du Canada, effectué à la date du 2 juin 1941. Ce volume classifie la population active par occupation et industrie de manière à indiquer le sexe, l'âge, l'état conjugal, le lieu de naissance, la période d'immigration, l'origine raciale, les années d'études, le status industriel, etc.

J'ai l'honneur d'être,
de Votre Excellence, le
très obéissant serviteur,

JAMES A. MACKINNON,
*Ministre du Commerce.*

OTTAWA, le 8 décembre 1944.

20366—A½

## PREFACE

Volume VII of the Eighth Census of Canada contains statistics of the gainfully occupied as of the census date, June 2, 1941, for Canada, the provinces, counties and census divisions, rural and urban, and for urban centres of 1,000 population and over. The tables of this volume are arranged in two divisions, the first consisting of occupation tables and the second of industry tables. In the tables of the first division the gainfully occupied is classified according to occupation by sex, age, conjugal condition, period of schooling, industrial status, birthplace, period of immigration, racial origin, length of residence in province, and occupation followed in 1931, for Canada and the provinces. Males retired from gainful occupation are classified according to occupation followed in 1931 for Canada only. In Table 11 the gainfully occupied is classified by occupation group and sex, for counties and census divisions, rural and urban. For cities of 100,000 and over the gainfully occupied is shown by occupation, age and sex, while for urban centres of 10,000 to 100,000 population occupations are shown in detail by sex only. However, for cities of 30,000 to 100,000 the gainfully occupied is classified according to occupation group to show age and sex. In the second division of the volume the gainfully occupied is classified according to industry by sex, age, conjugal condition, period of schooling, industrial status, birthplace, period of immigration, racial origin, and length of residence in province, for Canada and the provinces. In addition, Table 21 classifies industry by occupation and sex, for Canada and the provinces, while a summary of the data in this table, showing industry group by occupation group, is given for Canada only in Table 20. The gainfully occupied is classified by industry, age and sex for cities of 100,000 and over, and by industry and sex for urban centres of 10,000 to 100,000 population. Additional detail by industry group, age and sex is given for cities of 30,000 to 100,000 population, and by industry group and sex for the "greater" cities of 100,000 population and over in the city proper.

No figures are given for the Yukon and Northwest Territories in the provincial tables. However, the gainfully occupied in the Yukon and Northwest Territories is classified according to occupation, age and sex in Table 6.

In the Introduction various definitions and explanations of subject matter are given, while in the appendices a copy of the 1941 Population Schedule, maps outlining the census divisions and descriptions of "greater city" areas will be found. In addition, a special table classifying the gainfully occupied in the "greater" cities of Montreal, Toronto, Vancouver, and Winnipeg, by selected occupations and sex, for 1931 and 1941 is shown in Appendix A.

## PRÉFACE

Le volume VII du huitième recensement du Canada contient des statistiques sur la population active lors du recensement, le 2 juin 1941, pour le Canada, les provinces, les comtés et les divisions de recensement, les centres ruraux et urbains, de même que les centres urbains de 1,000 âmes et plus. Les tableaux de ce volume sont divisés en deux catégories: la première comprend des tableaux sur les occupations et la seconde, des tableaux sur les industries. Dans les tableaux de la première catégorie, la population active est classifiée selon l'occupation, le sexe, l'âge, l'état conjugal, les années d'études, le status industriel, le lieu de naissance, la période d'immigration, l'origine raciale, la durée de résidence dans la province et l'occupation exercée en 1931, pour le Canada et les provinces. Les hommes retirés sont classifiés d'après l'emploi qu'ils exerçaient en 1931 pour le Canada seulement. Dans le tableau 11, la population active est classifiée par groupes d'occupations et sexe, pour les comtés et divisions de recensement, les centres ruraux et urbains. Pour les cités de 100,000 âmes et plus la population active est répartie par occupation, âge et sexe, alors que pour les centres urbains de 10,000 à 100,000 âmes les occupations sont indiquées en détail par sexe seulement. Toutefois, pour les cités de 30,000 à 100,000 âmes la population active est classifiée selon les groupes d'occupations de manière à indiquer l'âge et le sexe. Dans la deuxième partie du volume la population active est classifiée selon l'industrie, le sexe, l'âge, l'état conjugal, les années d'études, le status industriel, le lieu de naissance, la période d'immigration, l'origine raciale et la durée de résidence dans la province, pour le Canada et les provinces. De plus, le tableau 21 classifie l'industrie par occupation et sexe, pour le Canada et les provinces, tandis que le tableau 20 donne pour le Canada seulement un sommaire des données du tableau précédent, indiquant les groupes d'industries par groupe d'occupations. La population active est classifiée par industrie, âge et sexe pour les cités de 100,000 âmes et plus, et par industrie et sexe pour les centres urbains de 10,000 à 100,000 âmes. Des détails additionnels par groupe d'industries, âge et sexe sont donnés pour les cités de 30,000 à 100,000 âmes, et par groupe d'industries et sexe pour les 'grandes" villes de 100,000 âmes et plus dans la ville proprement dite.

Aucun chiffre n'est donné pour le Yukon et les Territoires du Nord-Ouest dans les tableaux provinciaux. Cependant, la population active du Yukon et des Territoires du Nord-Ouest est classifiée selon l'occupation, l'âge et le sexe dans le tableau 6.

L'introduction contient plusieurs définitions et explications, tandis que les appendices renferment une reproduction du questionnaire sur la population en 1941, des cartes esquissant les divisions de recensement et des descriptions des "grandes villes". En outre, l'appendice A présente un tableau spécial classifiant la population active des "grandes" villes de Montréal, Toronto, Vancouver et Winnipeg par occupations choisies et sexe, pour 1931 et 1941.

The history and purpose of the census, the legislation under which it is taken, and the methods of collecting, checking and compiling the data, are described in full detail in the Administrative Report on the taking of the census. Attention may be particularly directed to the section of this Report which outlines the general plan according to which the volumes of the census are being issued and explains the nature of the materials contained in the present volume and their place in the general scheme of publication.

It should perhaps be mentioned that statistics from the 1941 Census on unemployment, and earnings and employment among wage-earners are contained in Volume VI.

The organization and general planning of the 1941 Census was carried on under the direction of A. J. Pelletier, F.S.S., Chief of the Census Branch. Since May, 1942, Mr. Pelletier has been seconded to the Government of Jamaica. Hence the materials for this volume were prepared under the direction of O. A. Lemieux, M.S.A., Ph.D., Acting Chief of the Census Branch, by A. H. LeNeveu, M.A., Statistician in charge of the Population and Occupations Section of the Census Branch.

S. A. CUDMORE,
*Dominion Statistician.*

OTTAWA, October 9, 1944.

L'historique et l'objet du recensement, la législation en vertu de laquelle il est effectué, les méthodes relatives à la réunion, la vérification et la compilation des données sont décrits avec force détails dans le rapport administratif du recensement. Il convient d'attirer particulièrement l'attention sur la partie de ce rapport qui esquisse le plan général adopté pour la publication des volumes du recensement et qui explique la nature de la matière contenue dans le présent volume et la place qu'elle occupe dans l'ensemble.

On pourrait peut-être mentionner que les statistiques du recensement de 1941 sur le chômage, les gains et l'emploiement chez les employés à gages sont contenues dans le volume VI.

L'organisation générale du recensement de 1941 s'est faite sous la direction de A. J. Pelletier, F.S.S., chef de la Branche du Recensement. Depuis mai 1942, M. Pelletier a été mis à la disposition du gouvernement de la Jamaïque. En conséquence, la matière de ce volume a été préparée sous la direction de O. A. Lemieux, M.S.A., Ph.D., chef suppléant de la Branche du Recensement, par A. H. LeNeveu, M.A., statisticien préposé à la section de la population et des occupations de la Branche du Recensement.

S. A. CUDMORE,
*Statisticien du Dominion.*

OTTAWA, le 9 octobre 1944.

## INTRODUCTION

**Occupation Inquiry.**—At the 1941 Census of Canada each gainfully occupied person, 14 years and over, was asked to state his or her chief occupation. Persons unemployed on the census date, June 2, 1941, reported the occupation last followed. Persons, 14 years and over, not gainfully occupied were enumerated either as "Retired", "Homemaker", "Student", or "None", as the case might be, in the occupation column of the Population Schedule. Those persons who, on account of old age, permanent physical disability, or otherwise, were no longer following a gainful occupation at the time of the census were classified by the enumerator as "Retired". A woman doing housework in her own home, without payment, and having no other gainful employment was enumerated as "Homemaker". Each young person, 14 years and over, regularly attending school or college or receiving private tuition was returned as "Student". Even if earning money after school as a messenger, newsboy, etc., he was enumerated as "Student". Only when not attending school and employed most of the day in some gainful employment was he regarded as gainfully occupied. All other persons, 14 years and over, not gainfully occupied were enumerated as "None". Among this group those young persons between 14 and 24 years of age were further asked whether or not they were seeking employment at the census date. If the answer was in the affirmative the entry by the enumerator on the Population Schedule was "None (yes)", and where the answer was in the negative the enumerator entered "None (no)" for such persons in the occupation column of the schedule.

Persons with gainful occupation were further asked to state the nature of the industry in which employed and their status in industry, i.e., as to whether employer, own account, wage-earner, or unpaid family worker.

**Definition of Gainful Occupation.**—A gainful occupation is defined in the census as one by which "the person who pursues it earns money or in which he assists in the production of marketable goods". As indicated above, older persons who because of physical disability or other reasons had given up their former occupations were enumerated as "Retired", while only those young persons not attending school and regularly employed in some gainful occupation were included among the gainfully occupied. Children, 14 years and over, assisting parents in the work of the farm or in some family business in a "no pay" capacity were considered as gainfully occupied, but daughters assisting with household duties in their own homes without wages were not included in the gainfully occupied population.

It should be mentioned that where a person customarily followed more than one occupation the enumerator recorded the occupation at which the person was employed most of the year period prior to the census date or at which he received the greater part of his earnings during that period.

**Status of the Gainfully Occupied.**—In the census each person with gainful occupation is classified either as an employer, an own account, a wage-earner, or an unpaid family worker (no pay).

## INTRODUCTION

**Questions sur l'occupation.**—Lors du recensement canadien de 1941, il a été demandé à chaque personne de 14 ans et plus ayant un emploi rémunéré de déclarer son occupation principale. Les personnes non employées à la date du recensement, le 2 juin 1941, ont déclaré la dernière occupation qu'elles exerçaient. Toute personne de 14 ans et plus, qui n'avait pas d'emploi rémunéré, était inscrite comme "retiré", "maîtresse de maison", "étudiant" ou "aucun", selon le cas, dans la colonne de l'occupation du questionnaire sur la population. Quant aux personnes qui, à cause de vieillesse, d'invalidité physique permanente ou autres raisons, n'exerçaient plus d'emploi rémunéré au moment du recensement, l'énumérateur les classifiait comme "retiré". Une femme faisant les travaux du ménage dans sa propre maison, sans rémunération, et n'ayant pas d'autre emploi rétribué a été inscrite comme "maîtresse de maison". Chaque jeune personne de 14 ans et plus fréquentant régulièrement une école ou un collège ou recevant des cours privés a été désignée comme "étudiant". Même si elle gagnait de l'argent après l'école comme messager, vendeur de journaux, etc., elle était inscrite comme "étudiant". Elle était considérée comme ayant un emploi rémunéré seulement lorsqu'elle ne fréquentait pas l'école et était employée la majeure partie de la journée à quelque emploi rétribué. Toutes les autres personnes de 14 ans et plus qui n'avaient pas d'emploi rémunéré étaient inscrites comme "aucun". Aux personnes de 14 à 24 ans comprises dans ce groupe on demandait en outre si elles étaient en quête d'emploi à la date du recensement. Dans l'affirmative, l'énumérateur entrait "aucun (oui)" sur le questionnaire sur la population; dans la négative, l'énumérateur entrait "aucun (non)" dans la colonne de l'occupation du questionnaire.

Aux personnes ayant un emploi rémunéré il était en outre demandé de déclarer la nature de l'industrie dans laquelle elles étaient employées et leur status dans l'industrie, soit employeur, à leur propre compte, employé à gages ou membre de la famille travaillant sans rémunération.

**Définition d'un emploi rémunéré.**—Le recensement définit l'emploi rémunéré celui par lequel la personne qui l'occupe gagne de l'argent ou par lequel elle participe à la production de marchandises vendables. Tel qu'il en est fait mention ci-dessus, les personnes plus âgées qui, en raison d'invalidité physique ou pour d'autres causes, avaient abandonné leurs anciennes occupations ont été inscrites comme "retiré", tandis que seules les jeunes personnes qui ne fréquentaient pas l'école et qui étaient régulièrement employées à quelque occupation rétribuée étaient incluses parmi la population active. Les enfants de 14 ans et plus qui aidaient à leurs parents sur la ferme ou dans quelque entreprise familiale, mais "sans rémunération", étaient considérés comme ayant un emploi rémunéré, mais les filles aidant aux travaux du ménage dans leur propre foyer, sans recevoir de rémunération, n'étaient pas comptées parmi la population active.

Il faut mentionner que, lorsqu'une personne avait habituellement plus d'un emploi, l'énumérateur inscrivait celui auquel la personne consacrait la majeure partie de l'année avant la date du recensement ou duquel elle avait retiré la majeure partie de son gain durant cette période.

**Status de la population active.**—Lors du recensement, chaque personne ayant un emploi rémunéré est classifiée comme employeur, à son propre compte, employé à gages ou membre de la famille travaillant sans rémunération (sans paye).

An employer is defined as one who operates his own business and employs others therein. An own account is one who carries on his trade, business or profession without the assistance of paid employees. A wage-earner is a person who works for wages or salary, including commission or piece rate forms of payment. An unpaid family worker is one who assists in a family business or on the home farm in an unpaid capacity. Included in this class are certain employees of institutions who during training period receive only board and room as payment for services rendered and members of religious orders who report no fixed money payment.

**Occupational versus Industrial Classification.**—The gainfully occupied are classified by occupation and industry in the tables of this volume. The group titles in these tables are similar but the composition of the groups is different. For example, the group, "Manufacturing", in industry tables, includes all persons employed by manufacturing firms, whether engaged in the processes of production, or in the sale or transport of the product, or in clerical or other occupations associated with the industry. On the other hand, in the occupation tables found in this volume only such persons as follow so-called "processing" occupations, that is, occupations in which they are directly engaged in the process of manufacture or repair, are included in the group "Manufacturing", and all persons following such occupations are classified in this group, irrespective of whether they were employed by manufacturing firms or by mining, construction, transportation, etc., companies at the time of the census. Similarly the groups, "Construction", "Transportation", for example, in industry tables include all persons employed in these industries irrespective of the nature of their occupations, while the occupational groups, "Construction", "Transportation", appearing in the occupation tables, comprise only those persons who were following construction trades and transport occupations, respectively, at the census date, regardless of the industries in which they were employed.

It might be mentioned that persons in clerical occupations have been assigned a separate place in the tables, while labourers in other than primary pursuits appear in a residuary group in these tables. Since the term "labourer", so reported, gives no indication of the type of work performed, it cannot be classified under any of the occupation groups shown in the tables. Even a knowledge of the industry in which employed does not supply the necessary information on the type of work performed by a person reported as a labourer, for a labourer in a steel mill, for example, might be working in a construction, transport, etc., type of occupation rather than in an occupation directly concerned with the process of manufacture.

The 1941 Classification of Occupations consists of 212 occupation classes as compared with 398 in the 1931 Classification of Occupations. The condensation effected in the occupational classification between 1931 and 1941 was confined largely to the manufacturing section where the several classes of "Owners, managers" and "Foremen", which in 1931 were shown under such headings as "Occupations in the Manufacture of Wood Products", "Occupations in the Manufacture of Chemical Products", etc., were combined to form one class of "Owners, managers" in "Manufac-

Un employeur est celui qui exploite sa propre entreprise et a d'autres personnes à son emploi. Une personne à son propre compte est celle qui exerce son commerce, son entreprise ou sa profession sans l'aide d'employés rémunérés. Un employé à gages est celui qui travaille pour des gages ou un salaire, y compris celui qui travaille à commission ou à la pièce. Un membre de la famille travaillant sans rémunération est celui qui prête son concours à une entreprise familiale ou sur la ferme sans être rétribué. Cette catégorie comprend certains employés d'institutions qui, pendant la période de leur formation, ne sont que pensionnés et logés en paiement des services qu'ils rendent, ainsi que les membres des communautés religieuses qui ne déclarent aucune rémunération déterminée.

**Classification des occupations vs classification des industries.**—La population active est classifiée par occupation et par industrie dans les tableaux de ce volume. Les rubriques des groupes dans ces tableaux sont semblables, mais la composition des groupes est différente. Par exemple, le groupe "manufactures", dans les tableaux sur les industries, comprend toutes les personnes employées par les établissements manufacturiers, qu'elles s'occupent de la production, de la vente ou du transport des marchandises, qu'elles fassent des travaux d'écriture ou remplissent d'autres fonctions se rattachant à l'industrie. Par contre, dans les tableaux sur les occupations contenus dans ce volume, seules les personnes employées à des occupations "de fabrication", c'est-à-dire directement employées à la transformation manufacturière ou la réparation, sont incluses dans le groupe "manufactures", et toutes les personnes employées dans de telles occupations sont classifiées dans ce groupe, qu'elles aient été employées par des établissements manufacturiers, des compagnies minières, des compagnies de construction, de transports, etc. au moment du recensement. De même, les groupes "construction", "transports", par exemple, dans les tableaux sur les industries, comprennent toutes les personnes employées dans ces industries, peu importe la nature de leurs occupations, alors que les groupes des occupations "construction", "transports", paraissant dans les tableaux sur les occupations ne renferment que les personnes qui s'adonnaient à des métiers de la construction ou à des occupations de transport, respectivement, à la date du recensement, peu importent les industries dans lesquelles elles étaient employées.

On peut mentionner qu'une place distincte dans les tableaux a été assignée aux personnes qui avaient des occupations de commis, tandis que les manœuvres dans des entreprises autres que primaires paraissent dans un groupe résiduel de ces tableaux. Comme le terme "manœuvre", ainsi déclaré, ne donne aucune indication du genre de travail accompli, il ne peut être classé sous aucun des groupes d'occupations mentionnés dans les tableaux. La connaissance de l'industrie qui l'emploi ne fournit pas non plus les renseignements nécessaires sur le genre de travail accompli par une personne qui se déclare "manœuvre", parce qu'un manœuvre dans une aciérie, par exemple, peut être employé dans la construction, les transports, etc., aussi bien qu'à une occupation liée directement aux opérations propres de la fabrication.

La classification des occupations comprend 212 catégories d'occupations en 1941 comparativement à 398 en 1931. La condensation opérée dans la classification des occupations de 1931 à 1941 s'est surtout limitée à la section manufacturière, où les multiples catégories de "propriétaires, gérants" et "contremaîtres" qui, en 1931, paraissaient sous des rubriques telles que "occupations dans la fabrication de produits du bois", "occupations dans la fabrication de produits chimiques" etc., ont été combinées pour former une seule catégorie de "propriétaires, gérants" dans les "manufactures"

turing" and one class of "Foremen" in "Manufacturing". In addition, a number of semi-skilled operative occupation classes in the 1931 Classification were not shown separately in 1941 but were included with such broad classes as "Other Occupations in Foods", "Other Occupations in Textiles", etc. Finally, a number of "Apprentice" classes in the 1931 Classification were combined in 1941 with the trades to which apprenticed. It was found impossible from the census returns to distinguish between apprentices and skilled craftsmen.

**Difficulties of Classification.**—As in past censuses difficulty was experienced in classifying persons reported vaguely as "agent", "engineer", "salesman", "repairman", "inspector", etc. However, the data on industry and status frequently supplied the necessary information for the coding of such incomplete statements of occupation. For example, "Salesmen" on salary or commission in wholesale trade were classified with "Commercial travellers" while those selling directly to the consumer were classified with "Canvassers and demonstrators". Fortunately, the term, "labourer", was not as commonly reported at the 1941 Census as in 1931.

In addition, a tendency to overstate occupational status was evident from other data, such as age or earnings, on the schedule. For example, office clerks were returned as accountants, mechanics as mechanical engineers, machine operators as machinists, and carpenters', electricians', etc., helpers as carpenters, electricians, etc. Frequently there was not sufficient evidence on the schedule for making any change in the occupations reported in cases of this kind.

On the 1941 Population Schedule space was provided to record both the type of product made or dealt in or service rendered, as well as the principal branch of industry, i.e., whether manufacturing, trade, etc. The information thus supplied made it much less difficult than in 1931 to distinguish between such cases as hardware *factory* and hardware *store*, *street* railway and *steam* railway, etc., although there was some confusion on the part of enumerators with respect to the reporting of principal branch of industry. For example, where the type of product given was "Meat packing" the branch of industry frequently reported was trade rather than manufacturing; similarly the industry, "Fish canning", was reported as in fishing rather than in manufacturing, and so on. Sometimes the term "Service", was loosely reported as the branch of industry, seemingly with reference to the occupation rather than to the industry.

As in previous censuses enumerators did not consistently distinguish between the various kinds of farming or mining, nor between mining and non-ferrous smelting and refining, car shops and steam railways, grain elevators and grain dealing, etc. In the iron and steel group of industries it was not always possible to distinguish from the entries on the Population Schedule between primary iron and steel manufacturing and other iron and steel industries. Finally, the common tendency to report the products manufactured in war industries simply as "War products", rather than specifying such products as, for example, ammunition, tanks, aircraft, etc., rendered the data from the census on the numbers employed in these industries of doubtful accuracy.

et une seule catégorie de "contremaîtres" dans les "manufactures". En outre, certaines catégories d'occupations exercées par des ouvriers mi-spécialisés dans la classification de 1931 n'ont pas été indiquées séparément en 1941, mais elles ont été incluses dans des catégories générales comme "autres occupations dans les produits alimentaires", "autres occupations dans les produits textiles", etc. Enfin, certaines catégories d'"apprentis" dans la classification de 1931 ont été combinées en 1941 avec les métiers dans lesquels se faisait l'apprentissage. Il a été impossible, d'après les rapports du recensement, de distinguer entre les apprentis et les ouvriers spécialisés.

**Difficultés de la classification.**—La classification des personnes qui s'étaient vaguement déclarées "agents", "ingénieurs", "vendeurs", "réparateurs", "inspecteurs", etc. a présenté des difficultés comme aux recensements antérieurs. Cependant, les données sur l'industrie et le status ont fréquemment fourni les renseignements nécessaires au chiffrage de ces déclarations incomplètes d'occupation. Par exemple, les "vendeurs" à salaire ou à commission dans le commerce de gros ont été classifiés avec les "commis-voyageurs", tandis que ceux qui vendaient directement au consommateur ont été classifiés avec les "démarcheurs et démonstrateurs". Heureusement, le terme "manœuvre" n'a pas été aussi communément déclaré au recensement de 1941 qu'à celui de 1931.

De plus, à en juger par d'autres données comme l'âge ou les gains, il y a eu une tendance à exagérer le status. Par exemple, des commis de bureau ont été inscrits comme comptables, des mécaniciens comme ingénieurs mécaniciens, des conducteurs de machine comme machinistes, des aides-charpentiers comme charpentiers, des aides-électriciens comme électriciens, etc. Souvent le questionnaire ne fournissait pas assez de renseignements pour motiver le changement des occupations déclarées dans les cas de ce genre.

Le questionnaire sur la population de 1941 renfermait un espace pour consigner le genre de produit fabriqué ou dont on faisait le commerce ou le service, de même que la principale branche de l'industrie comme l'industrie manufacturière, le commerce, etc. Les renseignements ainsi fournis ont rendu beaucoup moins difficile qu'en 1931 la distinction entre les cas tels que *fabrique* de quincaillerie et *magasin* de quincaillerie, *tramways* et *chemins de fer*, etc., bien qu'il y ait eu un peu de confusion chez les énumérateurs au sujet de la mention de la principale branche de l'industrie. Par exemple, quand le genre de produit donné était "salaison", la branche de l'industrie fréquemment déclarée était le commerce plutôt que la manufacture; de même, l'industrie de la "mise en conserve du poisson" était déclarée sous la rubrique "pêche" plutôt que sous celle de "manufacture", et ainsi de suite. Parfois le terme "service" était vaguement déclaré comme la branche de l'industrie, faisant apparemment allusion à l'occupation plutôt qu'à l'industrie.

Comme pour les recensements antérieurs, les énumérateurs n'ont pas fait de distinctions uniformes entre les différents genres de culture ou d'exploitation minière, entre l'extraction et la réduction et l'affinage des métaux non ferreux, entre les ateliers de réparation de wagons et les chemins de fer, entre les élévateurs à grain et le commerce du grain, etc. Dans le groupe d'industries du fer et de l'acier il n'était pas toujours possible de distinguer entre la fabrication primaire du fer et de l'acier et les autres industries du fer et de l'acier. Enfin, la tendance générale à déclarer simplement comme "matériel de guerre" les produits fabriqués dans les industries de guerre, au lieu de spécifier l'article produit, comme munitions, tanks, avions, etc., a conféré une exactitude douteuse aux données du recensement sur le nombre d'employés dans ces industries.

**Description of Tables.**—In Table 2 comparative information is given by occupation groups for Canada and the provinces covering the period 1901 to 1941. In this table the figures for each census year have been rearranged according to the occupational classification scheme of the 1931 Census. Further explanations concerning the content of this table will be found in a footnote to Table 2. Due to the difficulty of obtaining comparable census data over this period for individual occupations the comparison is limited to broad occupation groups. Additional historical information on occupations, including some comparative figures by selected occupations, will be found in the 1941 Census Bulletin entitled "Occupational Trends in Canada, 1901-1941".

Table 3 classifies the population, 14 years and over, by status, age and sex, for Canada and the provinces. In previous sections of the Introduction definitions of the various categories of persons shown in this table will be found. Since the data for certain classifications of persons not gainfully occupied were obtained from different sources some slight adjustment of the age distributions for these classes was necessary in compiling this table.

As explained in a later section, Table 4 classifies the gainfully occupied, including and not including persons on Active Service at the census date, by occupation, for Canada and the provinces. The number of males on Active Service by civilian occupation can be obtained for any province by subtracting the figures in the fourth column from the totals in the third column for each provincial section of the table.

This table also distributes the "Labourers" group by main industry groups for Canada and the provinces. For a comprehensive classification of occupations by industry groups the reader is referred to the 1941 Census Bulletin entitled "The Distribution of Occupations by Industry".

Occupation figures for the Yukon and Northwest Territories are shown in a separate table since such detailed analysis of the gainfully occupied as is given for provinces was not feasible for these regions.

For the first time in the Canadian Census occupation statistics are published for urban centres of 1,000 to 10,000 population and for counties or census divisions. The occupation data for these areas are given by occupation groups in Tables 10 and 11 respectively.

Tables 13 and 14 and Tables 27 and 28 give hitherto unpublished information on the occupations and industries of the migrant population. Tables 14 and 28 relate to the gainfully occupied with less than 10 years residence in the province in which residing at the census date, showing period of residence and the province or country of last previous residence by occupation and industry respectively.

At the 1941 Census all persons, 25 years and over, were asked to state the occupation in which employed in 1931. In Table 15 the gainfully occupied, 25 years and over, with gainful occupation in 1931 are classified according to occupation in 1941 to show the occupation group in which employed in 1931. Although no figures are available from the 1941 Census on the specific occupations followed in 1931, the data in Table 15 are valuable as indicating the broader occupational shifts that occurred over the decennial period, 1931 to 1941.

**Description des tableaux.**—Le tableau 2 établit des comparaisons sur les groupes d'occupations pour le Canada et les provinces pendant la période de 1901 à 1941. Dans ce tableau, les chiffres pour chaque année de recensement ont été redisposés d'après la classification des occupations adoptée au recensement de 1931. D'autres explications au sujet du contenu de ce tableau se trouvent dans un renvoi du tableau 2. Comme il a été difficile d'obtenir des données de recensement comparables pendant cette période pour chaque occupation particulière, la comparaison se limite à des grands groupes d'occupations. D'autres données historiques sur les occupations, y compris des chiffres comparatifs pour des occupations choisies, se trouvent dans le bulletin de recensement de 1941 intitulé "Tendances occupationnelles au Canada, 1901-1941".

Le tableau 3 classifie la population de 14 ans et plus par status, âge et sexe pour le Canada et les provinces. Les définitions des diverses catégories de personnes mentionnées dans ce tableau se trouvent dans une autre partie de l'introduction. Comme les données relatives à certaines classifications de personnes n'ayant pas d'emploi rémunéré ont été obtenues de sources différentes, il a fallu faire certains ajustements de la distribution d'âge de ces catégories dans la compilation de ce tableau.

Tel qu'il est expliqué dans une autre partie, le tableau 4 classifie la population active, y compris et non compris les personnes en service actif à la date du recensement, par occupation, pour le Canada et les provinces. Le nombre d'hommes en service actif, selon leur occupation civile, peut s'obtenir en soustrayant les chiffres de la quatrième colonne des totaux de la troisième colonne pour chaque section provinciale du tableau.

Ce tableau répartit aussi les "manœuvres" par principaux groupes d'industries pour le Canada et les provinces. Pour la classification complète des occupations par groupe d'industries, le lecteur est référé au bulletin de recensement de 1941 intitulé "Distribution des occupations par industrie".

Les chiffres relatifs aux occupations dans le Yukon et les Territoires du Nord-Ouest sont donnés dans un tableau séparé, parce qu'il était impossible pour ces régions de faire une analyse détaillée de la population active comme celle qui a été faite pour les provinces.

Pour la première fois dans le recensement canadien les statistiques des occupations sont publiées pour les centres urbains de 1,000 à 10,000 âmes et pour les comtés ou divisions de recensement. Les données sur les occupations pour ces régions paraissent par groupe d'occupations dans les tableaux 10 et 11 respectivement.

Les tableaux 13 et 14 et les tableaux 27 et 28 donnent des renseignements qui n'ont jamais été publiés jusqu'ici sur les occupations et les industries de la population migratrice. Les tableaux 14 et 28 ont trait à la population active qui a résidé moins de 10 ans dans la province où elle se trouvait à la date du recensement, indiquant la période de résidence et la province ou le pays de résidence antérieure par occupation et industrie respectivement.

Lors du recensement de 1941 il a été demandé à toutes les personnes de 25 ans et plus de déclarer l'occupation qu'elles avaient en 1931. Dans le tableau 15 la population active de 25 ans et plus est classifiée selon l'occupation en 1941 de manière à indiquer le groupe d'occupations dans lequel elle se trouvait en 1931. Bien que le recensement de 1941 ne donne aucun chiffre sur les occupations particulières exercées en 1931, les données du tableau 15 sont précieuses en ce qu'elles révèlent les changements généraux d'occupations survenus durant la période décennale de 1931 à 1941.

It might be mentioned that in Table 16 are shown the 1931 occupations of males who at the 1941 Census reported that they were "Retired" from gainful employment. The data in this table may be related to Table 5, which shows the occupations of males at older ages reported as gainfully occupied at the 1941 Census.

Table 21 gives a distribution of the gainfully occupied by occupation in each industry for Canada and the provinces. Although a careful revision of the consistency between the occupation and industry, as recorded on the Population Schedule, was made, it has not been possible to remove all errors of this kind from the census returns. However, the data in this table are valuable not only in giving approximate figures on the number of persons in specific occupations by industry but also in showing the relative importance of various occupations and occupation groups within each industry. It should be mentioned that the data in Table 21 have been rearranged in the form of a table showing the distribution by industry of each occupation. This table has been included in a 1941 Census Bulletin entitled "The Distribution of Occupations by Industry".

In Table 23 the gainfully occupied is classified by broad industry groups for the "greater" cities of 100,000 population and over in the city proper. Since statistics of employment by industry by cities from sources other than the Population Census are collected from the firm rather than the individual, as is the case in the Population Census, they probably more closely cover employment in the metropolitan areas as a whole than the cities proper. For comparative purposes, therefore, the figures in Table 23 may be found useful. It should be added that comparative statistics, by selected occupations, for the "greater" cities of Montreal, Toronto, Vancouver and Winnipeg, as of 1931 and 1941, will be found in Appendix A.

**Persons on Active Service.**—In a number of tables in this volume the total gainfully occupied, including all persons on Active Service, as well as the total not including persons on Active Service, are shown. The first total includes the total number of persons with gainful occupation in the population, 14 years and over, while the second total represents the number in the civilian labour force at the census date.

At the 1941 Census there were 313,452 males and 1,132 females on Active Service, of whom 249,934 males and 889 females were gainfully occupied prior to enlistment. In Table 3 persons on Active Service are shown by age for Canada and the provinces, while, as mentioned previously, from Table 4 the civilian occupations of all males on Active Service may be obtained by subtracting the fourth column from the third column of this table. Similarly, the civilian industries of males on Active Service may be derived from the data in the same columns of Table 17. Due to faulty enumeration the civilian occupations and industries of persons on Active Service were frequently not reported.

**Definition of Census Divisions.**—In Table 11 occupation group figures are shown by counties or census divisions. In this connection it should be explained that since in the Prairie Provinces and in British Columbia there are no county divisions, as in Eastern Canada, permanent areas, designated census divisions, were established (in 1921 in the case of the Prairie Provinces, and in 1931 for

Il convient de mentionner que le tableau 16 donne les occupations exercées en 1931 par les hommes qui se sont déclarés "retirés" d'emplois rémunérés au recensement de 1941. Les données de ce tableau peuvent être mises en relation avec celles du tableau 5, qui fait voir les occupations des hommes avancés en âge qui se sont déclarés employés avec rémunération au recensement de 1941.

Le tableau 21 donne une distribution de la population active par occupation dans chaque industrie pour le Canada et les provinces. Bien qu'il ait été fait une revision soignée de la compatibilité entre l'occupation et l'industrie, inscrites sur le questionnaire sur la population, il n'a pas été possible de faire disparaître toutes les erreurs de cette nature des relevés du recensement. Toutefois, les données de ce tableau sont précieuses, non seulement parce qu'elles fournissent des chiffres approximatifs sur le nombre de personnes ayant des occupations particulières par industrie, mais encore parce qu'elles montrent l'importance relative des diverses occupations et des groupes d'occupations dans chaque industrie. Il convient de mentionner que les données du tableau 21 ont été redisposées sous forme d'un tableau indiquant la distribution de chaque occupation par industrie. Ce tableau a été inclus dans un bulletin de recensement de 1941 intitulé "Distribution des occupations par industrie".

Dans le tableau 23 la population active est classifiée par larges groupes d'industries pour les "grandes" villes de 100,000 âmes et plus dans la ville proprement dite. Comme les statistiques de l'emploiement par industrie et par ville puisées à d'autres sources que celles du recensement de la population sont fournies par l'établissement plutôt que par l'individu, comme c'est le cas dans le recensement de la population, elles englobent probablement l'emploiement dans l'ensemble des régions métropolitaines avec plus d'exactitude que dans les villes proprement dites. C'est pourquoi, pour fins de comparaison, les chiffres du tableau 23 peuvent être utiles. Il faut ajouter que les statistiques comparatives, par occupations choisies, pour les "grandes" villes de Montréal, Toronto, Vancouver et Winnipeg, en 1931 et 1941, se trouvent à l'appendice A.

**Personnes en service actif.**—La population active totale, y compris les personnes en service actif, ainsi que le total sans les personnes en service actif, sont donnés dans certains tableaux de ce volume. Le premier total comprend toutes les personnes de 14 ans et plus qui avaient un emploi rémunéré, tandis que le second total représente le nombre de civils qui travaillaient à la date du recensement.

Au recensement de 1941 il y avait 313,452 hommes et 1,132 femmes en service actif, dont 249,934 hommes et 889 femmes avaient un emploi rémunéré avant de s'enrôler. Dans le tableau 3 les personnes en service actif sont indiquées par âge pour le Canada et les provinces, tandis que le tableau 4, ainsi qu'il en est fait mention précédemment, peut fournir les occupations civiles de tous les hommes en service actif en soustrayant la quatrième colonne de la troisième colonne de ce tableau. De même, on peut connaître les industries civiles des hommes en service actif en se servant des données des mêmes colonnes du tableau 17. En raison d'une énumération défectueuse, souvent les occupations et les industries civiles des personnes en service actif n'ont pas été déclarées.

**Définition de la division de recensement.**—Dans le tableau 11 les chiffres relatifs aux groupes d'occupations sont donnés par comté ou division de recensement. A ce sujet il convient d'expliquer, puisque dans les Provinces des Prairies et la Colombie Britannique il n'y a pas de divisions par comtés comme dans l'Est du Canada, que des régions permanentes, appelées divisions de recen-

British Columbia) for the publication of census statistics. In the Appendix C to this volume will be found maps outlining the boundaries of these census divisions.

**Presentation of Data in Tables.**—In order to conserve space in the printing of occupation and industry tables the general practice has been to list only occupations or industries with 5 or more persons, although the group or sub-group totals include all persons irrespective of the number gainfully occupied in the occupations or industries coming under these groups or sub-groups. It should also be mentioned that considerable saving of space was effected, especially in occupation tables, by presenting the data for males separately from the data for females. This economy in tabular presentation has made possible the inclusion in the volume of a number of special tables which it was felt were of sufficient interest to warrant publication.

sement, ont été établies (en 1921 dans les Provinces des Prairies et en 1931 dans la Colombie Britannique) pour la publication des statistiques du recensement. Des cartes esquissant les limites de ces divisions de recensement se trouvent dans l'appendice C de ce volume.

**Présentation des données dans les tableaux.**—Afin d'épargner de l'espace dans l'impression des tableaux sur les occupations et les industries, on a adopté comme méthode générale de n'énumérer que les occupations ou les industries comprenant 5 personnes ou plus; toutefois, les totaux des groupes ou des sous-groupes englobent toutes les personnes, peu importe le nombre d'employés rémunérés dans les occupations ou les industries comprises dans ces groupes ou sous-groupes. Il convient aussi de mentionner qu'on a épargné beaucoup d'espace, particulièrement dans les tableaux sur les occupations, en présentant les données sur les hommes à part des données sur les femmes. Cette économie réalisée dans la présentation des tableaux a permis d'inclure dans le volume un certain nombre de tableaux spéciaux qui, a-t-on pensé, étaient assez intéressants pour être publiés.

(1) Not including Yukon and Northwest Territories.

(2) 14 years and over in 1941.

(3) The figures for 1901 to 1931, inclusive, have been adjusted to include only the persons of "not stated" age who have been assigned to the population 10 years of age and over.

(4) The lower percentage of the gainfully occupied in 1901 than in later years is due in part to Indians being included in the population but not in the gainfully occupied.

(5) It is not possible to exclude the Northwest Territories from the 1901 figures. Hence the figures for Saskatchewan in 1901 include what is now Saskatchewan, Alberta, and Northwest Territories.

(6) Including persons on Active Service.

(7) Not including persons on Active Service.

(1) Ne comprend pas le Yukon et les Territoires du Nord-Ouest. (2) 14 ans et plus en 1941.

(3) Les chiffres de 1901 à 1931 inclusivement ont été ajustés pour inclure seulement les personnes d'âge "non donné" qui ont été assignées à la population de 10 ans et plus

(4) Un plus bas pourcentage de la population active en 1901 que dans les années suivantes est dû en partie à ce que les Indiens sont inclus dans la population mais non dans la population active.

(5) Il n'est pas possible d'exclure les Territoires du Nord-Ouest des chiffres de 1901. En conséquence, les chiffres relatifs à la Saskatchewan en 1901 ont trait à ce qui est maintenant la Saskatchewan, l'Alberta et les Territoires du Nord-Ouest.

(6) Comprend les personnes en service actif. (7) Ne comprend pas les personnes en service actif.

[1] 14 years and over in 1941.

[2] Not including Yukon and Northwest Territories.

[3] Does not include Indians.

[4] Does not include Indians living on reserves.

[5] Includes pulp mill employees.

[6] Less than 0·005 per cent

[7] Includes almost all mine and smelter employees, except clerical workers.

[8] Includes "Communication".

[9] Includes proof readers, shippers, weighmen, and postmen classified elsewhere in other years. The addition of these persons to the 1931 figure would have added 18·0 p.c. to the number of males in this occupation group.

[10] Labourers in all industries except agriculture, fishing, logging, and mining are included in this group.

[11] Separate figures for "Manufacturing" and "Construction" not available for 1901.

[12] Separate figures for "Transportation" and "Trade and finance" not available for 1901.

[13] Separate figures for "Professional" not available for 1901.

NOTE:—Occupations for 1901 to 1921, inclusive, and 1941 were rearranged on the basis of the 1931 classification, though some adjustment of the 1931 grouping was necessary. The principal changes made in the 1931 classification were the transfer of accountants from "Professional" to the "Clerical" group and of female labourers and packers and wrappers in manufacturing and trade from the groups "Labourers" and "Transportation", respectively, to "Manufacturing" and "Trade".

The 1941 figures in this table are exclusive of persons on Active Service on June 2, 1941.

[1] 14 ans et plus en 1941.

[2] Ne comprend pas le Yukon et les Territoires du Nord-Ouest.

[3] Ne comprend pas les Indiens.

[4] Ne comprend pas les Indiens demeurant dans les réserves.

[5] Comprend les employés des pulperies.

[6] Moins de 0·005 pour cent.

[7] Comprend presque tous les employés des mines et des fonderies, excepté les employés de bureau.

[8] Comprend "Communication".

[9] Comprend les correcteurs d'épreuves, expéditionnaires, peseurs et postillons, classifiés ailleurs, dans les autres années. L'addition de ces personnes aux chiffres de 1931 aurait ajouté 18·0 pour cent au nombre d'hommes dans ce groupe occupationnel.

[10] Les manœuvres dans toutes les industries, excepté l'agriculture, la pêche, l'abatage du bois et les mines, sont compris dans ce groupe.

[11] Les chiffres séparés pour "Manufactures" et "Construction" ne sont pas disponibles en 1901.

[12] Les chiffres séparés pour "Transports" et "Commerce et finance" ne sont pas disponibles en 1901.

[13] Les chiffres séparés pour "Professionnel" ne sont pas disponibles en 1901.

NOTA:—Les classes d'occupations pour 1901 à 1921 inclusivement et 1941 ont été ajustées d'après le groupement occupationnel de 1931, bien qu'il fut nécessaire de faire certains ajustements dans les occupations de 1931. Les principaux changements faits dans la classification de 1931 ont été le transfert des comptables du groupe "professionnel" au groupe des "commis de bureau" et des femmes manœuvres et des empaqueteuses et emballeuses, dans les manufactures et le commerce, des groupes des "manœuvres" et du "transport", respectivement, aux "manufactures" et au "commerce".

Les données de ce tableau en 1941 ne comprennent pas les personnes en service actif le 2 juin, 1941.

**TABLE 2. Number and per cent of the gainfully occupied, 10[1] years of age and over, classified according to sex, by occupation group, for Canada[2] and the provinces, 1901-1941**—Con.

(1) Not including Yukon and Northwest Territories.

(2) A.S. = Active Service.

(3) Less than 0·05 per cent.

(4) Includes young persons in institutions attending school but excludes students who have enlisted in the Armed Forces prior to June 2, 1941. The latter are included in the class "On Active Service".

(5) Persons retired from gainful occupation who have been admitted to an institution are included in the class "Inmates of institutions".

(6) See footnotes (4) and (5) on this page.

NOTE—See Introduction for an explanation of classes shown in this table.

(1) Ne comprend pas le Yukon et les Territoires du Nord-Ouest.

(2) S.A. = Service actif.

(3) Moins de 0·05 pour cent.

(4) Y compris les jeunes personnes dans les institutions qui fréquentent l'école mais les étudiants qui se sont enrôlés dans les forces armées avant le 2 juin 1941 sont exclus. Ces derniers sont inclus dans la classe "en service actif".

(5) Les personnes en retraite d'une occupation rémunérée, qui ont été admises à une institution, sont comprises dans la classe "pensionnaires d'institutions".

(6) Voir renvois (4) et (5) sur cette page.

Nor.—Voir dans l'introduction l'explication des classes mentionnées sur ce tableau.

(1) S.A.=Service actif.
(2) Ne comprend pas le Yukon et les Territoires du Nord-Ouest.
(3) Comprend les personnes en service actif le 2 juin 1941 sans emploi rémunéré avant l'enrôlement. Le nombre de ces personnes est montré ci-dessous:

| New Brunswick | | | Québec | | | Classe |
|---|---|---|---|---|---|---|
| T. | M. | F. | T. | M. | F. | |
| 17,279 | 17,215 | 64 | 49,023 | 48,842 | 181 | Total en service actif le 2 juin 1941. |
| 13,053 | 13,002 | 51 | 38,061 | 37,919 | 142 | Nombre ayant un emploi rémunéré avant leur enrôlement. |
| 4,226 | 4,213 | 13 | 10,962 | 10,923 | 39 | Nombre sans emploi rémunéré avant leur enrôlement. |

(4) H.f.=Hors de fabrique.

(1) Les manœuvres dans toutes les industries, excepté l'agriculture, la pêche, l'abatage du bois et les mines, sont compris dans ce groupe.

(2) Comprend les personnes dont l'occupation n'est pas donnée.

(3) Les chiffres dans ce tableau comprennent les personnes en service actif le 2 juin 1941 qui occupaient un emploi rémunéré avant leur enrôlement et les pensionnaires d'institutions à cette date déclarant une occupation rémunérée avant leur entrée.

**TABLE 10. Gainfully occupied, 14 years of age and over, by occupation group and sex, for urban centres of 1,000 to 10,000 population, 1941**—Con.

(1) Les manœuvres dans toutes les industries, excepté l'agriculture, la pêche, l'abatage du bois et les mines, sont compris dans ce groupe.

(2) Ne comprend pas le Yukon et les Territoires du Nord-Ouest.

(3) Comprend les personnes dont l'occupation n'est pas donnée.

(4) Les chiffres dans ce tableau comprennent les personnes en service actif le 2 juin 1941 qui occupaient un emploi rémunéré avant leur enrôlement et les pensionnaires d'institutions à cette date déclarant une occupation rémunérée avant leur entrée.

(5) Subdivisée pour correspondre avec les comtés municipaux.
